De  
Tuliparum per Germaniam  
ANNO SECULARI,  
Præfatio.

Peregrinum Germaniæ florem esse Tulipam,  
nemo ignorat: Quo tempore verò his terris, et quâ ratio,  
ne innotuerit, paucis forte cognitum. In antiquorum  
sane monumentis nomen ejus haut extat, quamvis  
non desint, qui ipsam ad τὴν λυλὴν Theophrasti, aut  
Marsium rubrum Plinij conjecturis plane incertis refe-  
rant. Alienigenam autem ex Asia esse, vel nomen i-  
psum prodit, quod proximè ad Turcicum verbum Tu-  
lipant, quo pileos suos illi populi denotant, accedit:  
Quin immo inter pileos Slavonicos, et florem Tulipæ  
nonnulla intercedere similitudo videri posset. At verò  
ante magnum illum Naturæ interpretem Conradum  
Gesnerum vix aliquis inter Germanos de Tulipa quic-  
quam in literas retulit, aut ejus iconem, quod sciam,  
exhibuit. Edidit autem ille librum de Hortis Germa-  
niæ, cum appendice et Corollario ad Valerij Cordi  
Historiam, anno supra millesimum quingentesimo  
sexagesimo primo, Argentorati impressum: In quo pri-  
mus, quantum constat, pinxit et descripsit Tulipam,  
quam primam Augusta in horto Magnifici viri

## PRÆFATIO.

Joann. Heinrici Herwarti viderat. Creverat autem ea ex semine, quod Byzantio vel, ut alij, è Cappadocia allatum fuerat, produxeratq; feliciter florem coloris rubri mense Aprili. Radicem verò sive bulbum ista vice à se conspectum Gesnerus negat, cum et rei novitas prohiberet, neq; florentem invito Domino liceret eruere. Ab illo tempore admodum increbuit fama hujus floris, et per navigationes præcipuè Belgarum tanta Bulborum copia paullatim Germaniæ illata fuit, ut viridaria nunc passim ipsis scateant. Hos profecto centum annos Tulipæ habuerunt tam propitios, ut pretium illarum immensum creverit. Inveni enim fuerunt inter Tulipistas Batavos, qui unicum bulbum ex primarijs incredibili ausu aliquot mille florenis redimere non dubitarunt. Sed & quæ omnium rerum satietas est, vilescere multis inceperunt jamdum ob abundantiam, accersitis præsertim Romanunculis Asiaticis nunc, et elegantissima Anemonarum varietate. Unde subsedit haut parum Tulipomania illa, neq; facile invenias hodie amatores tam fatuos.

Seculo igitur ab impressis Hortis Germaniæ nunc elapso, Iubilæum merito suum celebrent Tulipæ hoc ipso anno MDCLXI. Floræ numen precibus suppliciter implorantes, ut gloriam semel partam sequentibus quoq; seculis servare ipsis, querelamq; simul  
sopire

## PRÆFATIO.

velit stirpium odoratarum et medicinalium, quas Pœtæ recentiores fingunt Tuliparum honori invidentes, quod sola pulchritudine hæc superbiant, nulla interim singulari odoris gratia, neq; memorando in medicina usu excellent. At verò provida Dea salutari consilio ita constituisse videtur, ne Tulipæ, si cæteris etiam qualitatibus excellerent, amasios suos, quos sola hactenus specie subdolos reddidere, tum prorsus dementent.

Quantopere verò præ alijs Tulipas adamarint Belgæ, argumentum quoq; præbere possunt indita ab ipsis peculiaria nomina, quorum ingens hodie numerus circumfertur. Et quidem quadrant ea interdum appositè suis floribus, memoriamq; adjuvant: Non rarò verò valde discrepant, et parum habent ingenij. Præterea hortulani ipsi in hac nomenclatura admodum sunt inconstantes, et vetera nomina aut immutant, aut nova subinde fingunt: Unde necessario sequitur confusio. Sed et præcipuarum Tuliparum major pars perpetuo vix servat eundem floris colorem: Quin quotannis si advertas, plurimas observabis degeneraciones. Quamobrem mercatores Tuliparum in Belgio laudabili instituto primarias illarum, quas in viridarijs suis alunt, coloribus ad vivum curant exprimi, ut in foro icones emtoribus ostendere valeant, adscriptis nominibus usitatis, nonnunquam etiam pretio. Ejus,

## PRÆFATIO.

Ejusmodi verò icones sunt LXXII. illæ, quas præsens codex sub initium continet, pictæ ab artifice perito ad vivum exemplar selectissimarum Tuliparum, quibus horti Belgici superioribus annis nitebant. Quæ verò sequuntur, singula natæ sunt in vireto aulico, quod Potentissimus Elector, Dominus noster Clementissimus, FRIDERICUS GVLIELMUS, Coloniae Suevum anno MDCC XLVI, magnis sumtibus instruxit, et hucusq; conservavit. Cum verò imagines istæ singulis singula folijs essent delineatæ, ne dispersæ facilius perirent: In ordinem aliqualem per me redigi, et in usum nuper adornatæ Bibliothecæ Aulicæ uno comprehendi volumine, idem iussit PRINCEPS SERENISSIMUS. Ipsi Patriæ Patri pro summo in rem literariam amore gratias agimus immortales: Vitam vero longævam incolumemq;, et prosperos in Imperio successus ardentibus votis precamur.
